@ben3211

I'm a Full-Stack .NET developer with a curious and analytical mindset. Interested in technology, AI, and digital innovation, I enjoy learning across diverse fields such as finance, sports, astronomy, and life sciences. Adaptable and detail-oriented, I like exploring new tools and approaches to build efficient, reliable, and high-quality digital solutions. I value collaboration, precision, and consistency in every project I join.

EDUCATIONS

- Developer C# .NET -

IB group Cego, Bordeaux - 12.2022 / 03.2023

Databases with **SQL Server**

Boost web pages with **Angular, TypeScript** and **Bootstrap**

Advanced **C#** development and database queries.

Design of graphical interfaces with **Web ASP .Net MVC**

Development of **Azure** web applications and **web services**

Professional **Scrum** Developer Certification

- Web developer -

OpenClassroom - 09.2020 / 10.2021

Build a **secure, responsive** and **dynamic** website

Create **APIs** and **databases**

Design accessible web content, optimize natural referencing

Develop the **back-end** of a website with **Node.js, Express** and **MongoDB**

Use the **MySQL** database management system

- Finance -

Perceval finance, Bordeaux - 09.2018 / 10.2019

Analysis, management, and study of financial assets.

- Bachelor's degree in cell biology -

Faculty of Sciences of Luminy, Marseille

- 10.2011 / 10.2014

SKILLS

Language

C#, JavaScript, Java, TypeScript, Python, Mysql

Linguistics

French : native / Anglais : fluent

Frameworks

Asp.net, AngularJS, Scrum, Express, Vue.js, Blazor

Tools / Interface / Library

Microsoft Azure, Razor, jQuery, Interactiv Brokers, Pandas, Tkinter, Treeview, Pandastable, Node.js

HOBBY

Sport, competition (Basketball, windsurfing, skiing, Boxing)
Stock market / Biology / Astronomy

PROFESSIONAL EXPERIENCE

.NET Full-Stack Developer

Alp-Software, Thonon-les-Bains - Since Apr 2025

- Developed and maintained enterprise applications using **C#, .NET 8, Blazor, SQL Server, and REST APIs**. Implemented new features for invoicing and ERP modules, optimized database queries, and refactored front-end components for better performance and UX. Collaborated with cross-functional teams to deliver scalable and secure solutions.

Software Developer

Delta Vwap, Bordeaux - 08.2021 / 04.2022

- Software development in the analysis and processing of real time market data.
- Main programming language: **Python**
- Use of different tools/library: **Interactive Brokers API, IBridgePy, Pandas, Tkinter.**

Developer Back-End

Ctoutvert, Toulouse - Mar 2023 / Mar 2025

- Worked on the design, development, and maintenance of **applications and web portals** hosted in the **Azure Cloud**. Contributed to **refactoring and optimization efforts** to improve code quality, maintainability, and performance. Designed and implemented **APIs and web services** to enhance interoperability across systems. Participated in **migration projects**, ensuring smooth transitions to updated databases, frameworks, and software components. Also supported **CI/CD pipelines and deployments** across production and pre-production environments.
- **Technologies:** C#, .NET Core, Entity Framework, SQL Server, Vue.js, Razor, JavaScript, Redis, Azure, Azure DevOps.

Finance, Asset Management

Divergence , Bordeaux - 01.2022 / 10.2022

Independant, Bordeaux - 09.2019 / 08.2020

Cultural & Linguistic Development

Travel, Australia & South-East Asia - 10.2014 / 10.2016

- Agriculture, irrigation, and construction work. Strengthened English proficiency, developed autonomy, adaptability, perseverance, and gained valuable cultural and professional experience abroad.
